LUDVIG MOSBÆK, Proprietor

HANS MOSBÆK, Manager

FERNDALE NURSERY LIBRARY ASKOV, MINNESOTA

Free Delivery by Express or Parcel Post for Cash With Order
Except Where Otherwise Noted

This is our salesman. We have no colored illustrations to misrepresent and no glorious descriptions of what the plants will do for you, we can not afford either. We are engaged in growing hardy and healthy plants for the home builder. We are members of the Minnesota Horticultural Society which has by experience through many years, learned what varieties of fruit will thrive and do well in the different parts of Minnesota, therefore we do not propagate or offer fruits other than what that Society recommends for the so-called 5th zone in which Askov is located.

Our prices are based on cash on delivery for which we offer to prepay express or parcel post as the case might be on all plants offered except where otherwise mentioned. When you mail us your order for trees and plants we will ship seasonal plants such as strawberry at the right time, etc.

It costs money to keep traveling agents soliciting your orders; this we cannot afford at the present, however we will try to see as many of you as possible personally. We are reasonably sure it can be of mutual benefit to both parties if you consult with us in planning your planting, just drop us a postal and we will make it a point to see you at our earliest opportunity without any obligation for you to buy.

We grow thousands of perennial flowering plants for the wholesale trade; to introduce these hardy and lovely plants we offer as a PREMIUM for cash with order 10% value in perennial flowers when your order amounts to \$5, and 15% for a \$20 order, free of charge.

APPLES AND CRABS

Evergreen Windbreak. Evergreens constitute the logical windbreak for the farmstead, not alone in summer but more so in the winter. Deciduous trees give shelter in the summer when it is least needed, however they grow quick if both kinds are planted. Plant the first outside row of American Arbor Vitae, this when exposed to the full light will keep its branches right down to the ground and make a permanent foundation for the planting, or you can make it a hedge, the next rows to be planted with Fir, Pine and Spruce. A couple rows of Popple and Golden Willow inside will grow up quick and make a temporary windbreak. We have decided to offer Evergreens for less than we could sell them at wholesale in order to encourage the planting of Evergreen windbreaks in the North. Our Evergreens are transplanted two or more times whereby they get a bunch of small roots that make them sure to grow; they should be planted from 6 to 10 feet apart, the closer planting gives the quicker effect. We recommend to plant the first outside row with American Arbor Vitae, 5—6 feet apart and the balance of the windbreak 10 feet each way.

We offer for windbreak planting Evergreens, our selection, with Arbor Vitae for the outside row:

18—24 inches, 10 for \$5.00, 100 for \$40.00
2—3 ft. size, 10 for \$7.50, 100 for \$60.00

These prices are based on taking them right off from our nursery when we dig them and load them on your wagon at planting time, we will not pack and ship at the above mentioned prices.

ROSES—HYBRID PERPETUAL AND TEA

These bloom all summer, they should have some winter protection. Alfred Colomb, bright crimson; Frau Karl Druski, large silver white; Paul Neyron, bright pink; Gruss An Teplitz, velvety crimson; Carolina Testout, bright satiny rose, \$1 each, 5 for \$4.00.

HARDY FLOWERING PERENNIALS

These when once planted will grow stronger and bloom year after year. They are hardy, most of them will do better if a little strawy horse manure is thrown on top of them in the late fall.
